

Why Are Knowledge Organisers Important?

Our children need to know things; lots of things including:
Geography, Science, Art, Technology, Religion etc.

Knowing things helps them to know more things.
The more they know the easier they can learn something new.

What your child needs to know by the end of every topic is
organised into their Knowledge Organiser.

Learning this knowledge means it has to be stored in their long term
memory so it can be recalled and used at a later date; sometimes at a
much later date!

In order for this knowledge to be remembered we need to give the
children the opportunities to recall what they know.

We will give regular opportunities for children to remember that
facts on their knowledge organisers either through a quiz, missing
word games, labelling pictures etc.

You can support your child to learn the sections of the knowledge
organiser given for homework.

Ask them what they have learned and what they can remember.
